

**Saturday, August 29**

Palazzina Lorenese – ROOM E

## US-guided Peripheral Venous Access [US-PVA] for Physicians and Nurses

**Course Directors: M. Pittiruti (Italy), M. Lamperti (Italy)**

Organised by GAVeCeLT and WINFOCUS

One-day training course for physicians and nurses (6 hours overall), dedicated to the US-guided positioning of central and peripheral brachial venous lines (PICC and Midline).

Monothematic restricted-access theoretic-practical course, limited to 28 participants.

Registration fee: € 150,00 VAT included. The Course will only be held if a minimum of 20 attendants is reached.

9.00 am > 6.00 pm

### Theory

9.00 am	Course introduction
9.30 am	US physics and technology, semeiotics and anatomy of peripheral veins <b>D.G. Biasucci (Italy)</b>
10.30 am	PVA technique suitable for the US-guided implant of cannula needles, Midline and PICC catheters: Basilic vein, brachial veins, cephalic vein <b>M. Pittiruti (Italy)</b>
11.30 am	Evidence in the literature: Cost-effectiveness of brachial accesses; advantages of US-guided positioning <b>G. Scoppettuolo (Italy)</b>
	Discussion

12.30 pm Break

### Practice

2.00 pm	Training in US anatomy and US semeiotics of peripheral veins <b>Teachers: D.G. Biasucci (Italy) – M. Pittiruti (Italy)</b>
	US visualisation of the basilic vein, of the brachial artery and veins, of the cephalic vein on healthy models (small group training with separate teachers)
	Vein puncture training on a simulator <b>Teachers: I. Migliorini (Italy) – G. Scoppettuolo (Italy)</b>
	Example on a simulator of US-guided cannula needle positioning, Midline and PICC catheters (small group training with separate teachers)
6.00 pm	End of the course

Accreditamento ECM richiesto per Medico Chirurgo

Discipline: anestesia e rianimazione, medicina interna, medicina d'urgenza e per Infermiere
